

I am pleading with you to not weaken the Do Not Call law in New Jersey. I can't begin to tell you what a pleasure it is not to hear my phone ring during dinner or when I'm sleeping. I feel that I am perfectly capable of contacting a business if I would like to purchase their products. I do not need or appreciate a business "hounding" me to try and buy their products. When you receive approximately 20 telemarketing calls per day, at all hours of the day and night, when you're sick or sleeping or busy or trying to relax after a long day at work, it is a total intrusion on your life. Please do not change this law!

Thank you.
